Preface

It is the task of the volume editor to prepare the Organization pages and the Preface and to structure the volume in comprehensible parts. The Preface should give a good introduction to the volume and present the conference or workshop. Clear information regarding the peer review process (single or double blind / number of reviews per paper) and the numbers and types (full, short, invited) of papers submitted and accepted should be given. If invited papers are included in the main part of the manuscript, please include a sentence or two in the Preface explaining how they were reviewed. For contributions co-authored by any committee members, please explain in the Preface how these were objectively handled during the review phase.

The Preface is usually one or two pages long and is followed by the Organization pages. By default, for Springer Computer Science proceedings volumes, the volume editors (the people named on the book cover) should be the Program Committee Chairs, and they should also be the people who write the Preface. In this way, the Program Committee Chairs take responsibility for the scientific program of the conference, and for decisions on the content of the Springer-published proceedings.

If you plan any other approach, i.e., if you plan to have volume editors who are not the Program Committee chairs, please contact the Springer Editor to explain and to seek approval. If approved, we ask you to include a sentence about this in the Preface.

The names and roles of all of the Chairs should be included on the Organization pages. When listing the Program Committee members, kindly just state their names, their universities/affiliations and their countries and do not include the departments or the institutes within the universities. The names of the committee members should be ordered alphabetically, according to surname, as shown on the Organization pages following on from this Preface. Please also make sure that affiliations are spelt consistently.

At the end of the Organization pages, the sponsors may be listed and their respective logos displayed. The Steering Committee members are usually listed above the Program Committee members.

We prefer the use of American English in the Preface and we ask you to write the Preface in the past tense, because it is mainly read after the event. The Preface and the Organization pages will be copy-edited at our end, and any corrections are submitted to the corresponding volume editor for approval. Light technical copy-editing of the papers may also be performed.

The final Table of Contents is created by Springer from the title information in the papers. However, we ask you to provide us with a preliminary Table of Contents when you send the files. This should contain the titles of the papers and the names of the authors in the order in which they are to appear in the volume and should include topical section headings. The papers should be grouped

according to the topics they address and not according to the sessions of the conference. Any session numbering will be deleted by our typesetters. Please include all papers pertaining to one topic under one single topical heading, even if there are/were two or three such sessions at the conference. If the titles given in your preliminary Table of Contents differ from those in the papers, then we take the paper titles to be the correct ones and create the final Contents accordingly.

The Author Index is also generated at Springer, but you can help us present the authors' names in the correct way by submitting a list of authors who have complex family names, particles, or suffixes, or do not use the Western name order (i.e., given name(s); family name). It should be made quite clear, which part of the name is the given name and which is the family name.

Please check that the names of the authors are written consistently throughout the proceedings volume. If an author has contributed to more than one paper, their name should be spelt and structured in an identical manner in all papers as well as in the Table of Contents.

At the end of the preface, the month and year should be inserted on the left-hand side and the names of the authors of the preface (i.e., the PC Chairs) should be listed on the right-hand side. Please note that pages I–IV (in front of the Preface) are prepared by Springer.

Organization

General Chair

Robert Bai	University of Cambridge, UK

Program Committee Chairs

Vincent García	Technische Universität Dresden, Germany
Laurent Ho	Dublin City University, Ireland
Steffen Rao	Carleton University, Canada

Steering Committee

Michael Agarwal	KU Leuven, Belgium
John Banerjee	McMaster University, Canada
Antonio Chan	Harvard University, USA
Stefano Guo	Ritsumeikan University, Japan
Mohamed Fang	University of Porto, Portugal
Alessandro Davis	University of the Aegean, Greece
Rafael Hoffmann	Hanyang University, South Korea
Mike López	Universidad de Granada, Spain
Marek Keller	University of Calabria, Italy
Adrian Kwon	Massachusetts Institute of Technology, USA
Hans Meyer	University of Kaiserslautern, Germany
Nicholas Pinto	Siemens AG, Germany
Marcus Reddy	ETH Zurich, Switzerland
Sandra Ryu	University of Bonn, Germany
Patricia Silva	Universidad Autónoma de Madrid, Spain
Edward Smith	King's College London, UK
Tomáš Weber	University of Turku, Finland
Gerhard Wu	Masaryk University, Czech Republic
Hiroki Yamamoto	Bielefeld University, Hungary
Werner Yoshida	University of Catania, Italy

Program Committee

Thomas Ahmad	University of Minho, Portugal
Paul Bao	Nagoya University, Japan
Roberto Chu	University of Melbourne, Australia
Ruth de Oliveira	University of Ljubljana, Slovenia

Paolo Feng	University of South Australia, Australia
José Geng	Shandong University, China
Johannes Gupta	University of Electronic Science and Technology, China
Juan Hong	Polish Academy of Sciences, Poland
Ricardo Islam	University of Oslo, Norway
Pavel Jiao	University of Oxford, UK
Julien Khan	RWTH Aachen, Germany
Ahmed Lai	Helsinki University of Technology, Finland
Ulrich Liao	University of North Carolina, USA
Jason Lu	Jadavpur University, India
Samuel Ng	University of Granada, Spain
Daniele Park	University of Lisbon, Portugal
Nick Ren	University of California, USA
Alexandra Saha	Purdue University, USA
Bernard Shang	Beijing University of Technology, China
Jeff Simon	Swinburne University of Technology, Australia
Harald Tan	Anna University, India
Oscar Tran	Johannes Kepler University, Austria
Kenji Wei	National University of Defense Technology, China
Axel Xia	Monash University, Australia
Karl You	Lund University, Sweden
Manfred Zhao	University of Duisburg-Essen, Germany
