[LNCS Acceptance Note: SciSec 2025]

Dear Feng Liu,

I am hereby sending you Springer Nature's formal acceptance email for the proceedings relating to the following event:

- Event: SciSec 2025, Copenhagen, Denmark, 15–17 August 2025
- Website: <http://www.scisec.org>
- Predecessor volume(s): [SciSec 2024](#)

It is my pleasure to confirm that we formally accept SciSec 2025 for publication as a Lecture Notes in Computer Science (LNCS) post-proceedings volume. We look forward to cooperating with you and your colleagues.

One of our project managers will contact you regarding the package delivery schedule and procedure.

Information for Volume Editors and Conference Organizers

Attached to this email you will find the Instructions for Authors and the Editor Guidelines. Please read the guidelines carefully and refer to the checklist at the end. It is also important that you use the attached licence-to-publish agreement. None of the other agreements are applicable here. If possible, a partially completed agreement should be made available to the authors, to be completed and signed by the corresponding author of each paper, on behalf of all of the authors of that paper. The corresponding author, who must match the corresponding author marked on the paper, must have the full right, power, and authority to sign the agreement on behalf of all of the authors of a particular paper, and accepts responsibility for releasing this material on their behalf. Once the files have been sent to Springer, changes relating to the authorship of the papers cannot be made.

As to the timeline, we need 8 – 10 weeks upon receipt of your complete set of electronic files to publish the proceedings. Rapid dissemination of the scientific work presented at conferences is one of

SPRINGER NATURE GROUP

the advantages of publishing proceedings, so we would encourage you to send the manuscript files as soon as possible. If the authors have been given the opportunity to improve their papers following the event and before sending their final submissions to you, please inform me. This will have an effect on the subtitle of the proceedings.

Information regarding free copies and the prices of additional copies can be found in the attached Conf Terms PDF. If you wish to opt for 4-week free access for the participants via the conference website, kindly inform us when you send us the files of the papers for publication.

We've attached an example of a front matter. You can see in this our default requirements for details in the Preface and the structure of the Organization. The templates for generating the front matter are available from our [website](#).

Information to Be Made Available to Authors

We recommend that you announce publication of the proceedings in LNCS on your website and include the [logo](#), which can also be downloaded from the bottom of the [editors' page](#). You may also like to link to previous SciSec proceedings on SpringerLink, <https://link.springer.com/conference/scisec>, from your website. The book metrics available on SpringerLink give details on the number of citations, downloads, and readers at paper level and at book level.

Authors should consult Springer's Instructions for Authors of Proceedings and use either the LaTeX or the Word templates provided on the [authors' page](#), for the preparation of their papers.

If you or any of the authors contributing to SciSec 2025 are interested in Open Access (which applies to the entire volume) or Open Choice (which applies to individual papers), please refer to our [webpage](#) for prices and additional information. We would need the invoicing address and the CC-BY licence-to-publish agreement at least three weeks before the deadline for the files.

Volume Editors

By default, for Springer Computer Science proceedings volumes, the volume editors (the people named on the book cover) should be the Program Committee Chairs, and they should also be the people who write the volume Preface. In this way, the Program Committee Chairs take responsibility for the scientific program of the conference, and for decisions on the content of the Springer-published proceedings. Attached to this email, please find a template for the preface and the organization pages.

If you plan any other approach for these proceedings, i.e., if you plan to have volume editors who are not the Program Committee chairs, please contact Herman Gu now to explain and to seek approval. Your suggestion will be evaluated, and if approved we will advise you about our related conditions (including how this decision-making structure should be revealed later in the published Preface and Organization pages).

Springer Nature Policies, Special Request

SPRINGER NATURE GROUP

We request that you as conference volume editors draw the attention of the contributing authors to our Code of Conduct (<https://www.springernature.com/gp/authors/book-authors-code-of-conduct>).

It is important for us that the authors of the papers accepted for inclusion in the Springer-published proceedings volume adhere to these specific policies.

If you have any questions that are not answered in the guidelines, please contact the responsible editor, Herman Gu.

Best regards
